Jamie Owens before your next investment in these types of tools. Let an expert show you the latest technology and answer your questions. Contractors and design teams have more options than ever when it comes to choosing the best solutions to improve the success and outcomes that should be considered in order to make the right selection for your project. Members of the Central Ohio Chapter of COGENCE Alliance embraced new business models and technologies that will help them become more productive, efficient, innovative and creative in their approach. Learn more about some of the mega-trends that will be changing the business of construction in the near future.

Donna Laquidara-Carr (Dodge Data & Analytics)

Breakout Sessions • 9 – 10 a.m.

(M3) Construction 2025: Mega-Trends Today & Tomorrow
In the next five years, some believe there will be more change in the construction environment than over the last five decades. In order to compete, companies must embrace new business models and technologies that will help them become more productive, efficient and creative. In their approach. Learn more about some of the Mega-Trends that will be changing the business of construction in the near future.

Shane Brown and Keith Martinez (Plante Moran)

(M2) Six Degrees of Design & Construction Risk
What are the greatest risks faced by every design and construction project? That’s the question the Central Ohio Chapter of COGENCE Alliance asked a group of owners, architects, engineers, construction trades and insurance/banking/legal affiliates. You’ll explore the results of the study and learn how the information can be utilized to transform the industry to be more collaborative, with reduced risk and improved outcomes.

Members of the Central Ohio Chapter of COGENCE Alliance

(M1) Game of Zones: Using Gaming to Understand Commissioning
Using an interactive board game, attendees will play through different phases (i.e. “Zones”) of a new construction project to see how different levels of commissioning affect the outcome. Throughout the presentation, successes and pitfalls that can happen during each phase will be identified, resulting in an active discussion about which level of commissioning might be right for your next project.

Michael Ball and Hillary Hansan (Engineering Economics, Inc.)

(M4) Making Sense of New Technology
 Contractors and design teams have more options than ever when it comes to choosing software and devices for project development and delivery. There are key components and outcomes that should be considered in order to make the right selection for your project team. Let an expert show you the latest technology and answer your questions before your next investment in these types of tools.

Jamie Owens (MAGNET Technologies)

Breakout Sessions • 10:20 – 11:20 a.m.

(M5) The Danger of Living in a Connected World
In today’s world, we frequently hear how smart technologies are a target for hackers. Do you understand the importance of secure maintenance and deployment as devices are connected to the Internet? A team of cyber security experts will share the challenges and risks of smart technologies and discuss the impact and integration in commercial and residential buildings.

Moderator: Connie Matthews (RaynCon)
Panellists: Kent King (Columbus State Community College)
Lou Lyndra and Jason Montgomery (RaynCon)
Doug McCallough (City of Dublin)

(M6) What’s the Hype...Hyperloop, Smart City & Steady Growth!
There are exciting opportunities ahead for the future-focused central Ohio region. Area leaders are collaborating to improve access, quality and quantity when it comes to mobility and housing. MORPC’s director of transportation and infrastructure will highlight their approach to designing the future of the region through sustainability and innovation, with the goal of economic prosperity and a high quality of life.

Thea Walsh (Mt–Ohio Regional Planning Commission)

(M7) Improving Collaboration Through Preconstruction Innovations
Project success relies on multiple factors, and firms are recognizing the importance and value of a strong preconstruction phase. Innovative workflows that allow for model-based estimating provide an opportunity for increased collaboration between contractors, clients and design teams. Discover the benefits of utilizing design models and learn best practices for implementing new technology applications.

Jeff Smoker and Kelsey Stein (Skanska)

(M8) Data Analytics to Transform Your Company & Transition the Industry
Data analytics has the power to transform your company, market, people and projects. Discover the key to unlocking efficiency, reducing risk and improving safety in a deep-dive that explores a top industry trend from the morning keynote. Benchmark your company against where the industry stands now, learn where the greatest potential lies and gain insight into the benefits and challenges of becoming a data-driven company.
