2022 Awards

Safety Innovation Award › For creative and unique safety practices or tools.

› **Lang Masonry & Restoration Contractors** - Grate System for Block Cutting

The old school way of cutting block was not ergonomically friendly since it increased slip hazards from the water and left slurry and material pieces scattered on the ground.

A grate system was designed to fit the top of mortar tubs. The grate system allows water and pieces of debris to be captured inside the mortar tub instead of falling to the ground. This keeps the walking space around the work surface dry and removes potential trip hazards from the vicinity. When the mortar tub is full, it can be easily moved and dumped with a forklift.

Safety Achievement Award › For outstanding injury and illness statistics.
